

Progress Report Seminar Frühjahr 2012
jeweils am Dienstag um 8.30 Uhr im Y17 H05

Datum	Referent	Thema	Gruppe
21.02.2012	Leila Tarokh	<i>Adolescents Asleep: A Window on the Developing Brain</i>	PA
28.02.2012	Joanes Grandjean	<i>Frequency distribution of the BOLD signal during resting-state in mice using a phased-array cryogenic coil at 9.4T</i>	MR
06.03.2012	Katrin Stadelmann	<i>Changes in the Sleep EEG at moderate attitude</i>	PA
13.03.2012	No Seminar		
20.03.2012	Amrita Madhusudan	<i>The interaction of Reelin and its physiologically active fragments with APP – Implications for Alzheimer's disease</i>	JMF
27.03.2012	Marco Dominietto	<i>Multimodality approach to study the fractal physiology of tumor angiogenesis</i>	MR
03.04.2012	Patrick Maier	<i>Ischemia mediates downregulation of cell surface GABA_B receptors via ER stress-induced transcription factor CHOP</i>	HUZ
17.04.2012	Dimitrije Krstic	<i>Reelin Cleavage: Complex Interplay of Extracellular Matrix Proteins</i>	JMF
24.04.2012	Alicia Arranz de Miguel	<i>Use of Fluorescence molecular tomography for the in vivo follow-up of a glioma model</i>	MR
08.05.2012	Nicolas Personnic	<i>Significance of Gephyrin-PP1 interaction in synapse plasticity</i>	JMF
15.05.2012	Nandkishor Mule	<i>Role of EETs in pain perception</i>	MA
22.05.2012	William Ralvenius	<i>Antihyperalgesic Actions of Diazepam in Mice Carrying Multiple Diazepam-Insensitive GABA_A Receptor Types</i>	HUZ
29.05.2012	Sebastian Holst	<i>FMR1, mGluR5 and the sleep EEG</i>	HPL
