

Progress Report Seminar Herbst 2012
jeweils am Dienstag um 8.30 Uhr im Y17 H05

Datum	Referent	Thema	Gruppe
18.09.2012	Wolfger von der Behrens	<i>Psychometrics and neurophysiology of frequency discrimination in the whisker system</i>	BW
25.09.2012	Edmund Foster	<i>The role of CCK expressing spinal interneurons in neuropathic pain</i>	UZ
02.10.2012	William Ralvenius	<i>Are brainstem cannabinoid receptors responsible for paracetamol pain relief?</i>	UZ
09.10.2012	Carolin von Schoultz	<i>Endocannabinoid-Dependent Plasticity at Spinal Nociceptor Synapses</i>	UZ
16.10.2012	<i>No Seminar – Neuroscience Meeting</i>		
23.10.2012	Robert Dallmann	<i>Circadian gene expression profiles of tumors using in vitro and in vivo continuous monitoring of bioluminescence</i>	SAB
30.10.2012	Steffi Lehmann	<i>From microscopic to macroscopic imaging of the hypoxia induced plasticity of cancer cell invasion</i>	MR
06.11.2012	Claire de Groot	<i>Collybistin: The interplay of different splice variants to regulate GABAergic postsynaptic proteins</i>	JMF
13.11.2012	Amandine Valomon	<i>Individual Sleep-wake profiles: Roles of genetic polymorphisms</i>	HPL
20.11.2012	Irène Knüsel	<i>Deciphering the mechanism underlying late-onset Alzheimer's Disease</i>	JMF
27.11.2012	Christine Muheim	<i>Genetic Basis of Mammalian Sleep</i>	SAB
04.12.2012	Francine Deprez	<i>Role of gephyrin for maturation of newborn neurons in the adult olfactory bulb</i>	JMF
11.12.2012	Sandra Pfister	<i>Molecular and cellular network regulating stem cell activity and neurogenesis in the olfactory epithelium</i>	JMF
18.12.2012	Anette Orjuela	<i>ER-resident protein interaction analysis by FRET-LSCM</i>	MA
